

CASE STUDY

Extreme Vulnerable Individual EVI at Jalojai Camp

CHALLENGE Mr. Niamat Ullah having belongs to tribe Aka Khel Sama Garhi Tehsil Bara District Khyber Agency. Niamat Ullah has been registered with his father having registration # 102278 and living in tent # 32 sector B block # 2 of phase 7 at Jalojai camp. He belongs to the poorest family of his community; he could continue his studies and left school at the age of ten years. By unknown reason he lost one of his legs when he was very young. His family was suffering very poor life working as daily wagers, but the family confronted more miseries, when the Military operation started in area where he and his family live. The financial status of the family becoming worst day by day, after the rise of militancy in his area, Niamat Ullah and his family along with other residents of the area had left no other option than to leave their homes and village to save their lives. The family left their houses and village in such an emergency that they left all of the items of daily usages. The family was suffering having no shelter, enough food, and clean drinking water and living in unhygienic environment with unhygienic practices.

INITIATIVE : LASOONA has started baseline survey to intervene in the WASH sector and categorized the WASH needs for the camp; currently LASOONA is working in phase 7 and 8 of Jalojai IDPs camp district Nowshera.

RESULTS Niamat Ullah was identified one day during a WASH committees members' meeting at his blog. Niamat Ullah narrated his story after holding that meeting.

“We have been assisted and facilitated in almost every sector like food, shelter, WASH, health and education”. Said by Mr. Niamat Ullah..

In WASH facilities, clean chlorinated water for drinking, Latrines, Laundry spaces, tape stands, washing pads and bathing facilities are being installed for us by LASOONA. As there was also a need of continuous mobilization regarding hygiene practices, therefore, the health promoters of LASOONA regularly started their sessions regarding personal, domestic, environmental and diarrheal management's topics.

“It was very difficult for me being extremely vulnerable individual (EVI) to use WASH facilities and especially pit latrine, thanks to LASOONA for providing this facility to vulnerable like me in the camp. This special EVI latrine has not only decreased my miseries but now I am living a satisfied life as my basic needs are being ensured by LASOONA in the IDPs camp”. Said by Niamat Ullah
